GEORGIA STATE UNIVERSITY
ATLANTA, GEORGIA 30303

PREFACE AND ACKNOWLEDGEMENTS

This is the seventh issue of the Fact Book. It is designed to offer brief but pertinent information on a variety of subjects of interest to the staff, students, faculty, and friends of Georgia State University. It is hoped that the material selected by the Editor will be informative and interesting to the reader. There are obviously many other subjects and facts of special interest to many people which are not included in this publication. If more detailed information is needed on the material presented, the source indicates the office or reference data used. Reports referred to are available in the University Library.

We appreciate your favorable reactions to past issues of the Fact Book, and hope that you will continue to give us your suggestions for improvement of future issues. Students, both individually and collectively, have used the Fact Book to gain more understanding about their institution. We are pleased, too, that many institutions throughout the nation have expressed an interest in this publication.

Our appreciation is extended to the various campus offices which assisted us with the development of the information. The cooperation was excellent. We are especially appreciative of the continuing support by the Cartography Laboratory of the Geography Department.

The project was conducted as a service to the University. The graphic illustrations were prepared by Mrs. Jan Wadley; and Mr. Leonard Hagerman assisted with the pictorial illustrations. Typing services were rendered by Miss Holly Post and Miss Diane Toni.

General Information

CAPSULE HISTORY OF THE UNIVERSITY

In 1913, the Georgia Tech Evening School of Commerce, under the direction of distinguished Georgia Tech staff member Wayne S. Kell, opened its doors with an enrollment of 47 students. From these meager beginnings, the school grew to what is now Georgia State University, the second largest institution of higher learning in Georgia.

Under directors John M. Watters in 1918, Fred B. Wenn in 1925, and finally Dr. George M. Sparks in 1928, the Georgia Tech Evening School of Commerce continued to grow until it became an independent college in the reorganized University System of Georgia in 1933.

The school remained independent for a number of years--through the Great Depression and World War II until 1947, when the Board of Regents determined that the institution's functions could be incorporated into the program of the University of Georgia. It continued to function under the direction of the University of Georgia with the title of the "Atlanta Division of the University of Georgia."

In 1955 it became evident that the institution had a destiny of its own. It was separated from the University of Georgia and renamed the "Georgia State College of Business Administration" with Dr. George Sparks as President.

Two years later Noah Langdale, Jr. took over as President on the retirement of Dr. Sparks. In 1961, the Board of Regents changed the name of the institution to Georgia State College. Under the leadership of President Langdale, new degrees and programs were added.

Finally, in 1969, in recognition of the academic achievements of the institution, and the services provided for both students and the community, the Board of Regents granted the college university status. Georgia State College became Georgia State University.

Georgia State University has continued to be innovative in developing new programs for students, faculty and citizens alike. The expanded, modern city-campus environment of the University today provides a unique setting in which to fulfill its threefold mission of teaching, service and research.

SOURCE: Director of Public Information

STATEMENT OF PURPOSE OF THE UNIVERSITY

Georgia State University endeavors to promote the advancement of knowledge through excellence in teaching, research, and public service. The University sees its role as meeting the need for a broad range of educational opportunities in the largest population center in the State. Its location adds an operational dimension to the education of students by affording opportunities to participate in the vast social, artistic, and scientific learning laboratory that characterizes modern society. In a climate of academic freedom, where creativity is encouraged, the University strives to serve individual students, other institutions of higher learning, social institutions and agencies, and society at large. The University thus endeavors to exercise direction and leadership by extending the boundaries of knowledge through research and scholarly activity, and by providing programs which embody excellence.

Georgia State University endeavors to develop in each student a respect for the dignity and worth of the individual; a desire and capacity for critical reasoning; an appreciation and understanding of scholarship and creativity in the arts, humanities, and sciences; the ability to communicate; and a continuing desire for knowledge. By offering undergraduate, graduate, and advanced professional programs as well as expanded credit and non-credit educational opportunities in the continuing learning experience, the University seeks to assist individuals of all ages to discover and realize their own potentialities--to become a learning people rather than just learned people. The institution thereby endeavors to provide initially and on a continuing basis the requisites for competence, personal fulfillment, and responsible leadership in business and the professions, in the sciences, in the creative and performing arts, in government and public service, and in education.

PROFILE OF THE UNIVERSITY

Type:	Georgia State University is a non-residential state-supported institution--a truly "urban university." It is a unit of the University System of Georgia.
Location:	Two and one-half blocks from "Five Points"--the historic center of Atlanta. Georgia State University is within an hour's commuting distance of two million citizens in the Greater Atlanta area.
Size:	Largest public urban university in the Southeast. Second largest institution of higher learning in the State of Georgia.
Campus:	Close to the commercial heart of the city and near the state government complex. The high rise buildings, plazas and pedestrian bridges make Georgia State a unique campus. The Physical Plant contains in excess of two million square feet.
Students:	Most students work either full-time or part-time and pursue their studies on a similar basis. The average age of the student body is 27. Georgia State students account for over one-tenth of all enrollees at accredited colleges in Georgia, both public and private. Student enrollment totals 20,283.
Schools:	School of Allied Health Sciences (Established 1968) School of Arts and Sciences (Established 1933) School of Business Administration (Established 1913) School of Education (Established 1967) School of General Studies (Established 1968) School of Urban Life (Established 1970)
Faculty:	Three of four of the teaching faculty hold the doctorate; about half are tenured; the average age is 40; and the average length of service is seven years. The total regular faculty numbers 839.
Course Offerings:	In an average quarter, over two thousand courses are offered, scheduled from 7:00 a. m. to 10:00 p. m. During the academic week, the University's doors are seldom closed.
Degrees:	The number of degrees conferred this past year totaled 4,403 including 96 doctorates, 164 specialists, 2,043 masters, 1,911 bachelors and 189 associate degrees. There are 44 degree programs offered by the six schools and Institute of Governmental Administration with 196 areas of concentrations.
Public Service:	During 1975-76, 53,876 persons participated in conferences, workshops, institutes, short courses and seminars sponsored by the University; in addition, speeches were delivered to approximately 223,000 persons. The Urban Life Center provides one of the most modern educational conference centers in the nation.

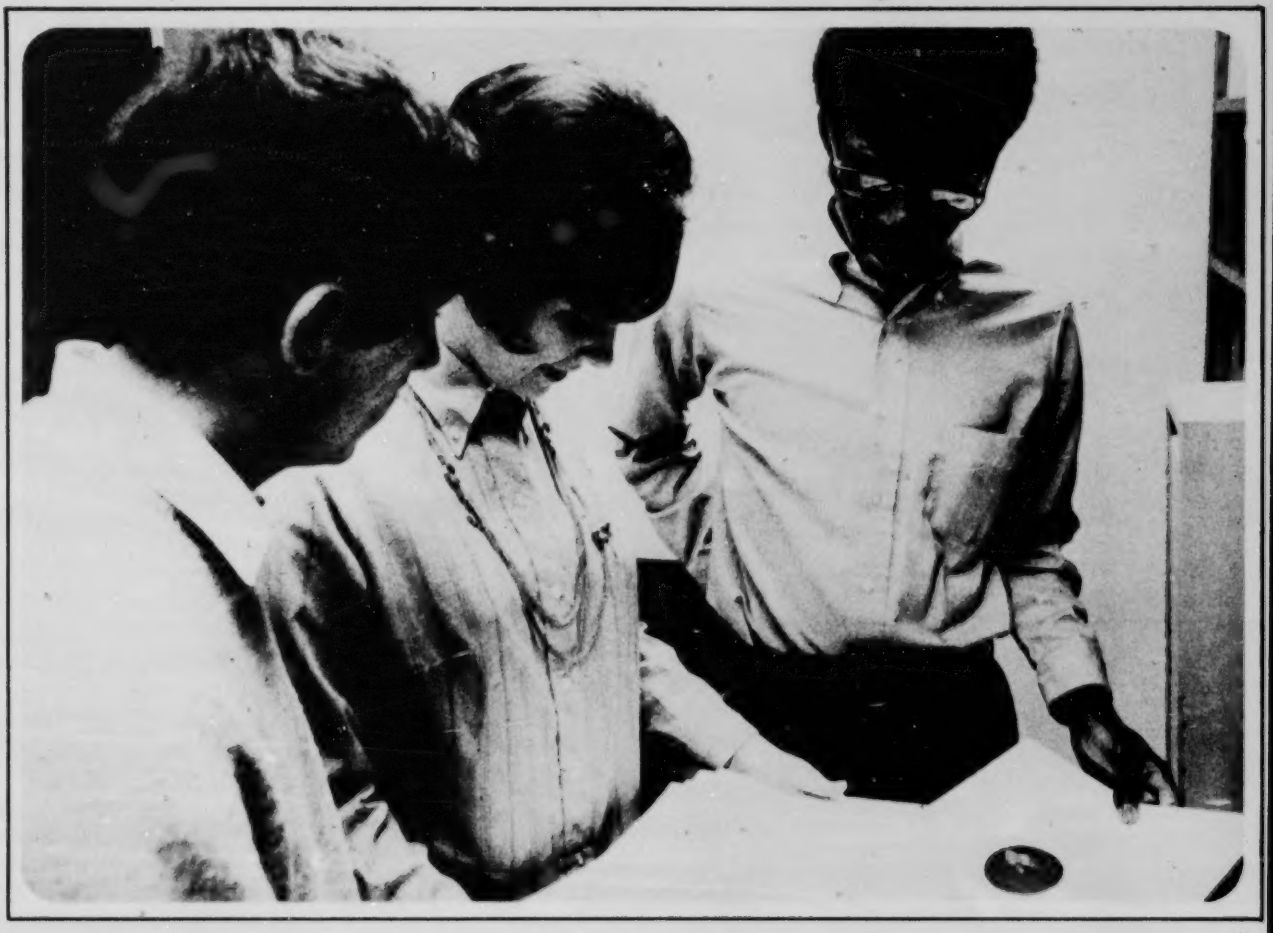
Degree Information



GEORGIA STATE UNIVERSITY
Degrees Offered

SCHOOL OF ALLIED HEALTH SCIENCES	
Associate of Science (1968)	Majors in Mental Health, Nursing, Pediatric Assistants, Respiratory Therapy
Bachelor of Science (1961)	Majors in Community Health Nutrition, Medical Technology, Mental Health, Nursing, Physical Therapy, Respiratory Therapy
Master of Science (1972)	Majors in Medical Technology, Nursing
SCHOOL OF ARTS AND SCIENCES	
Bachelor of Arts (1958)	Majors in Anthropology, Art, Classics, Economics, English, Foreign Area Studies, French, Geography, German, History, Journalism, Mathematics, Philosophy, Political Science, Psychology, Sociology, Spanish
Bachelor of Music (1959)	
Bachelor of Science (1957)	Majors in Biological Sciences, Chemistry, Geology, Mathematics, Physics, Psychology
Bachelor of Visual Arts (1966)	
Master of Arts (1962)	Majors in Art History, Economics, English, French, Geography, German, History, Mathematics, Philosophy, Political Science, Psychology, Sociology, Spanish
Master of Arts for Teachers (1962)	Majors in Biology, Chemistry, English, French, Geography, German, History, Mathematics, Physics, Political Science, Spanish
Master of Music (1970)	
Master of Science (1964)	Majors in Biology, Chemistry, Mathematics, Physics
Master of Visual Arts (1970)	Majors in Art Education, Ceramics, Drawing and Painting, Graphic Design, Sculpture
Doctor of Philosophy in English (1968)	
Doctor of Philosophy in History (1968)	
Doctor of Philosophy in Political Science (1973)	
Doctor of Philosophy in Psychology (1967)	
Doctor of Philosophy in Sociology (1976)	
SCHOOL OF BUSINESS ADMINISTRATION	
Bachelor of Business Administration (1948)	Majors in Accounting, Actuarial Science, Economics, Finance, Health Administration, Information Systems, Insurance, Management, Marketing, Real Estate and Urban Affairs
Master of Actuarial Science (1963)	
Master of Business Administration (1958)	Majors in Accounting, Economics, Finance, Industrial Relations, International Business, Management, Marketing, Real Estate and Urban Affairs, Risk and Insurance

SCHOOL OF BUSINESS ADMINISTRATION (Continued)	
Master of Business Information Systems (1969)	
Master of Decision Sciences (1969)	
Master of Health Administration (1963)	
Master of Insurance (1967)	
Master of Professional Accountancy (1964)	
Doctor of Business Administration (1962)	Fields in Accounting, Administrative Theory, Economic and Public Policy, Economic Theory and Analysis, Finance, Industrial Relations, International Business, Land Economics and Urban Affairs, Management and Marketing and Distribution Management, Quantitative Methods and Analysis, Risk and Insurance
Doctor of Philosophy in Business Administration (1967)	Fields in Accounting, Actuarial Science, Decision Sciences, Economic Theory and Analysis, Finance, Health Administration, Industrial Relations, Information Systems, International Business, Land Economics and Urban Affairs, Management, Marketing and Distribution Management, Quantitative Methods and Analysis, Risk and Insurance
Doctor of Philosophy in Economics (1965)	
SCHOOL OF EDUCATION	
Associate of Science in Education (1972)	(To prepare Educational Paraprofessionals)
Bachelor of Arts in Elementary Education (1966)	
Bachelor of Science in Recreation (1974)	
Bachelor of Science in Education (1968)	Majors in Bookkeeping and Business Management, Comprehensive Business Education, Early Childhood Education, Elementary Education, Health Education, Physical Education, Safety Education, Secretarial Science, Secondary Education, Special Education, Vocational and Career Development
Master of Business Education (1962)	
Master of Education (1966)	Majors in Administration and Supervision, Counseling and Guidance, Early Childhood Education, Elementary Education, Foundations of Education, Physical Education, Reading Instruction, School Psychometry, Secondary Education, Special Education, Speech Pathology, Vocational and Career Development, Vocational Rehabilitation Counseling
Master of Library Media (1973)	
Specialist in Education (1962)	Majors in Administration and Supervision, Business Education, Counseling, Early Childhood Education, Elementary Education, Library Media, Reading Instruction, School Psychology, Secondary Education, Special Education, Vocational and Career Development
Doctor of Philosophy in Educational Leadership (1970)	Fields in Business Education, Counseling, Curriculum and Instruction, Early Childhood Education, Educational Administration, Educational Foundations, Special Education, Vocational and Career Development

SCHOOL OF GENERAL STUDIES

Associate of Arts (1964)	Majors in General Studies, Secretarial Science
Associate of Science (1973)	Majors in Aviation Administration, Hotel/Motel Administration, Commercial Music-Recording

SCHOOL OF URBAN LIFE

Associate of Arts in Criminal Justice (1967)	
Associate of Science in Urban Life (1967)	
Bachelor of Science in Urban Life (1967)	Concentrations in Communications, Community Development, Criminal Justice, Human Resources, Social Welfare, Urban Government and Administration, Urban Studies
Master of Science in Urban Life (1969)	Concentrations in Urban Government and Administration, Urban Community Development: Physical Resources, Urban Community Development: Human Resources, Criminal Justice Systems, General Urban Studies

INSTITUTE OF GOVERNMENTAL ADMINISTRATION

Master of Governmental Administration (1972)

NOTE: There are 44 degrees with 196 concentrations or majors offered by the six Schools and Institute of Governmental Administration. Effective dates of degrees are indicated in parentheses.

GEORGIA STATE UNIVERSITY
Survey of Entering Freshmen

A survey of entering freshmen was conducted by the Admissions Office at Georgia State University. The study population was the Incep participants in the Fall of 1975. The Office of Institutional Planning provided the analytical support which involved analyzing and interpreting data and preparation of the survey report.

The questionnaire instrument was designed to obtain the answer to three basic questions: Why did the student enroll in a college? Why did he or she select Georgia State University? How did the student view the admissions process at Georgia State University?

Highlights of the findings included:

College

- Parental influence was perceived by the respondents as being very strong in the student's decision to attend college. High school counselors, classmates, college representatives and recruitment literature were generally reported as having only a minor influence on the student's decision.
- Economic considerations appeared to be important factors motivating students to seek a college education--to avoid future unemployment, to prepare for a profession or career, and to earn a higher income.
- The respondents expressed strongly that they also sought a college education to gain knowledge for personal reasons or self-improvement.

GSU

- The academic reputation of the University, its location within commuting distance of their residence, and tuition rate were paramount considerations.
- Students did not generally feel that they were influenced by the University's efforts to attract them (e.g., recruitment visits and literature).
- Most students did not regard the availability of student financial aid as being very important.

Admissions Process

- The admission process was viewed as being generally good to excellent; and the personnel, pleasant and courteous.

* Freshmen who completed a minimum of 40 quarter credit hours.

** Freshmen who completed a minimum of 25 quarter credit hours.

*** Estimated. Data from same source as other data not yet available. Estimated data is from Georgia State University Admissions Report to General Faculty, 1975-76.

Key: Beg = Entering Freshmen Group Statistics at the beginning of Fall Quarter.

End = End of Freshman Year Group Statistics at the end of either 25 or 40 quarter credit hours.

N/A = The 1967-1969 editions of Normative Data reported the Verbal and Mathematics scores of the SAT as total scores. Analysis of previous data revealed that the Total SAT could be used for predicting freshman grades without reducing the predictive efficiency of the test. However, in 1970, the Normative Data editions began reporting separate SAT scores and no totals. For comparative purposes and for convenience, the Verbal and Mathematics scores have been totaled.

GEORGIA STATE UNIVERSITY

Student Organizations

Georgia State University offers multi-faceted services and facilities to promote student interest and development. The University community consists of individuals of various ages, backgrounds and interests, and the administration, faculty and students all work toward providing organizations and services aimed at these individual interests and needs. The Dean of Students staff is particularly open to serving individual students who wish to organize groups with interests ranging from professional to social, including cultural, religious, political, recreational, educational, service-oriented, honorary, theatrical, etc. The possibilities of student organizations are limited only to the individual student's needs and interests.

The Student Government Association is the official governing body and the official collective voice of all Georgia State University students. This group is representative of the needs of the University community and encourages participation in both time and ideas. The Student Government Association sponsors many groups on campus, including involvement with academic improvement, consumer assistance, student services and welfare, entertainment, films, student activities, external affairs, internal operations, etc.

Student Media consists of a campus newspaper, the SIGNAL, which is printed on a regular basis and informs the community of news and events at Georgia State University; an educationally licensed FM radio station, WRAS, which broadcasts 24 hours daily; the Georgia State University yearbook, the RAMPWAY, recording the school year's student life; and the Georgia State University Review, a publication of Georgia State University literary, artistic and photographic achievements.

The Interfraternity Council and the Intersorority Council serve as self-governing bodies representative of the campus fraternities and sororities, pooling ideas and coordinating several joint activities during the school year.

The Intramural Council, an organization of students which formulates the rules, schedules and policies pertaining to various intramural athletic events serves the recreational and competitive interests of the student body.

There are 116 student organizations. The categorical breakdown is as follows:

Educational--10
Social--21
(Fraternities--11, Sororities--10)
Professional--19
Recreational Groups--10
Religious Groups--9
Service and Social--11
Special Interest and Political--12

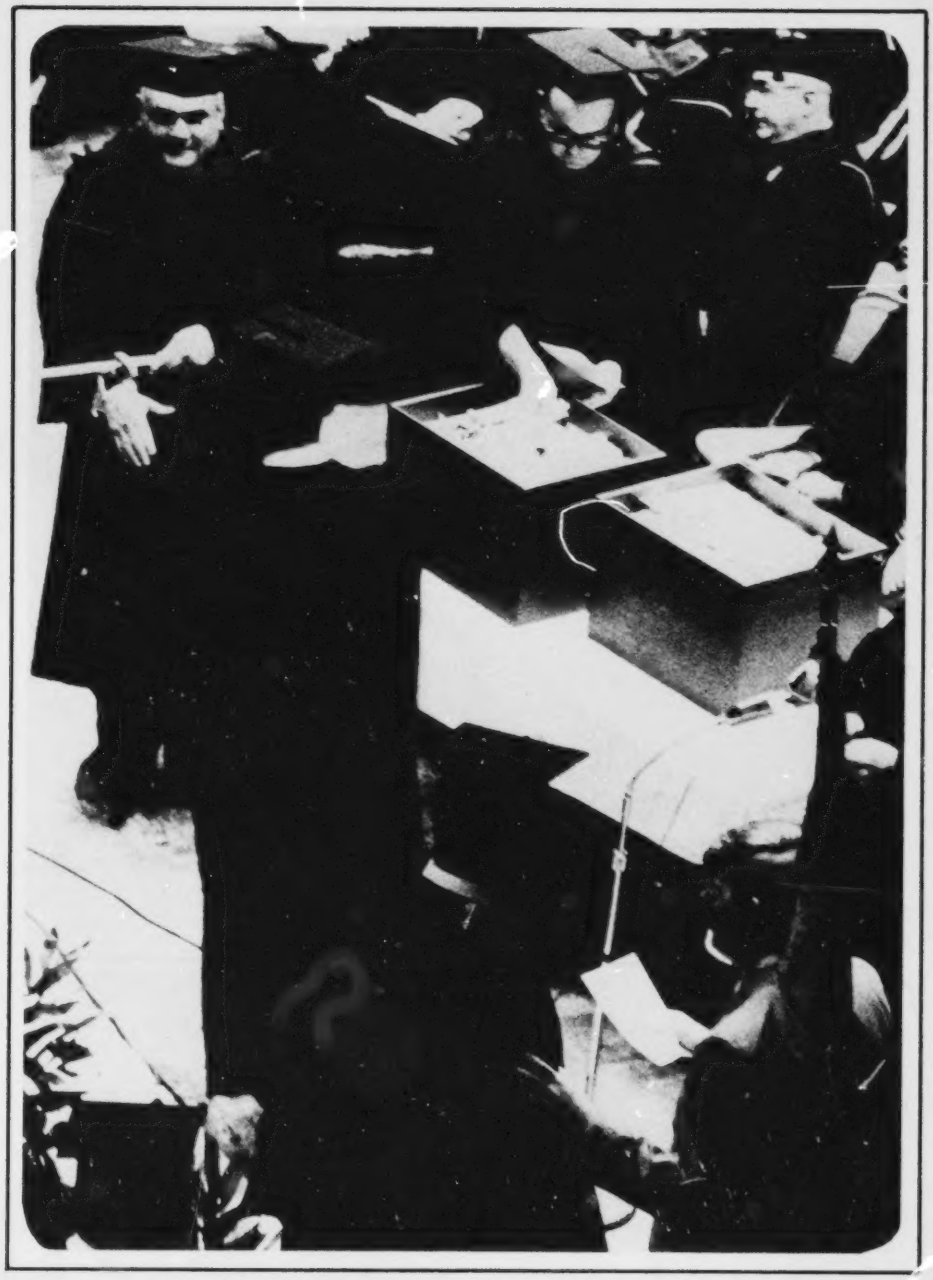
Alumni



GEORGIA STATE UNIVERSITY

ALUMNI ASSOCIATION

The Georgia State University Alumni Association was incorporated in 1963 to "promote, aid, encourage, perpetuate and develop the aims and objectives of Georgia State University". To accomplish this end, the Association sponsors a variety of programs that fall into four major categories: alumni giving, student/young alumni relations, alumni personal and professional development and alumni activities.

The Alumni Association serves the University by (a) providing monies for scholarships and grants for students, (b) giving financial aid to various University programs, (c) recommending outstanding students for admission, (d) representing the University's interests on a local, regional and statewide basis, and (e) providing leadership for special programs and activities. The Association, in turn, serves its members through various activities designed for their benefit, education, and enjoyment. Alumni tours, continuing education programs, library privileges, recreation activities and an annual Homecoming celebration are but a few of the activities and services provided for alumni.

In an effort to provide a useful service to current students while increasing their awareness of the Alumni Association, a new program has been inaugurated to provide students with current information about jobs or careers they might be considering. The Association's Career Consultation Service is in its second year of operation, and has been highly rated by those students who have taken advantage of the program. Basically, the student reviews a list of alumni volunteers in fields such as accounting, banking, retailing, social services, art, data processing, and many others, and then chooses the counselor he or she wishes to visit. The Alumni Office maintains current lists of volunteers, facilitates the visits, and tabulates a constant evaluation of the results of these contacts.

Alumni programs and services are defined by a 35-member volunteer Board of Directors. Specific projects and programs are then carried out by these individuals with the assistance of other alumni volunteers and the Alumni Office staff. A tabloid newspaper is published six times a year and mailed to all alumni of record to keep them informed of developments at the University, and of what other alumni are doing.

INTERESTING FACTS AND FIGURES ABOUT

GEORGIA STATE UNIVERSITY ALUMNI

- Current alumni mailing list contains the names and addresses of over 30,000 individuals.
- Nearly 400,000 individual pieces of mail were sent to GSU alumni last year through the Alumni Association.
- Three-fourths (76%) of GSU graduates remain in the Metropolitan Atlanta area following graduation. A total of 83% remain in Georgia.
- GSU graduates live in all 50 states and 34 foreign countries.
- Approximately one-third of all alumni (10,000) will move during the next year.
- Sixty percent of all alumni received their degrees in the past five years (1971 - 1976).
- Seventy percent of all alumni are under 40 years of age.
- Forty-five percent of all alumni are engaged in "professional" occupations.
- One out of five GSU graduates supports the Alumni Association.
- The average alumni gift for 1975 - 1976 was $24.88.
- A total of over $103,000 was contributed to the Alumni Annual Fund in 1975 - 76.
- Nearly a quarter million dollars in student financial aid was generated through alumni gifts last year by taking advantage of the various matching provisions of federal aid-to-education programs.
- The typical donor to the Georgia State University Alumni Annual Fund:
  - is between twenty-two and forty years of age
  - is married and resides in metropolitan Atlanta
  - received a bachelors degree from GSU between 1969 and 1974
  - lists his occupation as professional or managerial
  - has an annual income between $16,000 and $25,000
  - graduated from the School of Business Administration
  - feels that his college experience at GSU has been extremely helpful to him in his career.

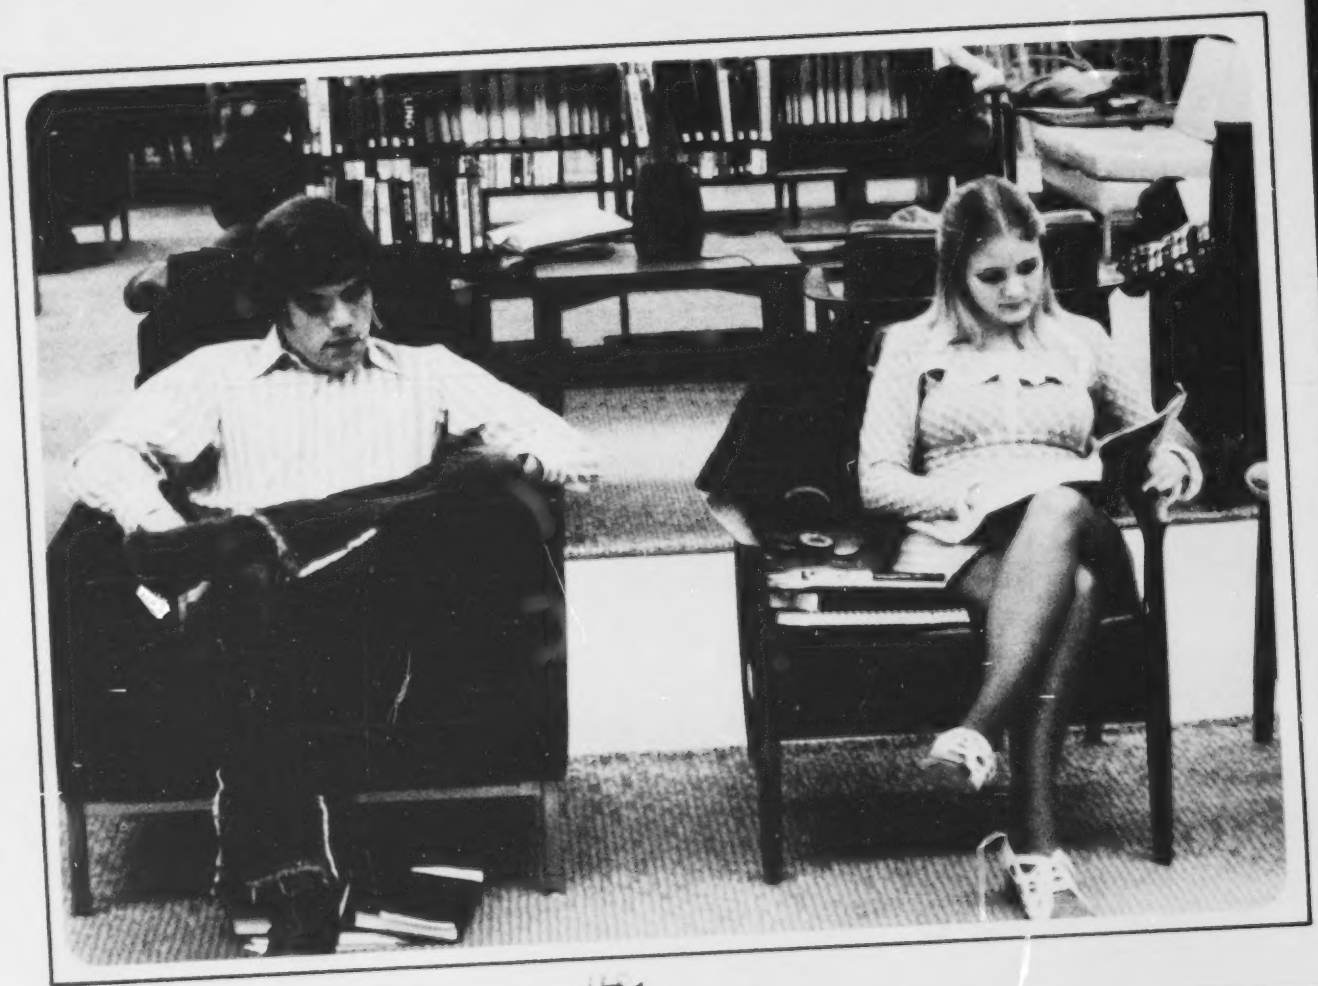
Library



GEORGIA STATE UNIVERSITY

LIBRARY

The William Russell Pullen Library is a six-story structure located near the geographic center of the campus. Construction of the present Library building was completed in 1969. The ground level houses parking facilities while the upper five levels provide a shelf capacity of 700,000 volumes and a seating capacity of 2,200. There is an open stack arrangement with color coded graphics posted at strategic points to aid the patron in locating the materials needed.

The staff of the Library is comprised of full-time and part-time employees. Approximately 25 percent of the full-time staff are professional librarians holding faculty rank with appropriate graduate degrees in Library Science from accredited library schools.

Special library facilities include: rare book room, listening room, microform reading room, graduate and faculty lounges, graduate lockers, eight student conference rooms, and twelve dissertation study rooms.

The Library has automated book order and circulation systems. Statistics on holdings and circulation are indicated below.

Holdings	FY 1976
Number of volumes added during year	34,000
Number of volumes held at end of year	546,886
Number of reels of microfilm held at end of year	41,468
Number of physical units of other forms of microtext held at end of year	410,514
Number of periodical titles being received at end of year	4,403
Number of other serial titles being received at end of year	4,516

These above figures do not include uncataloged special collections which number as follows:

Items	FY 1976
U. S. Documents	240,844
Annual Reports of Corporations	28,441
Pamphlet Collections	19,417

Circulation Data	FY 1976
Student Circulation	284,131
Faculty Circulation	19,734

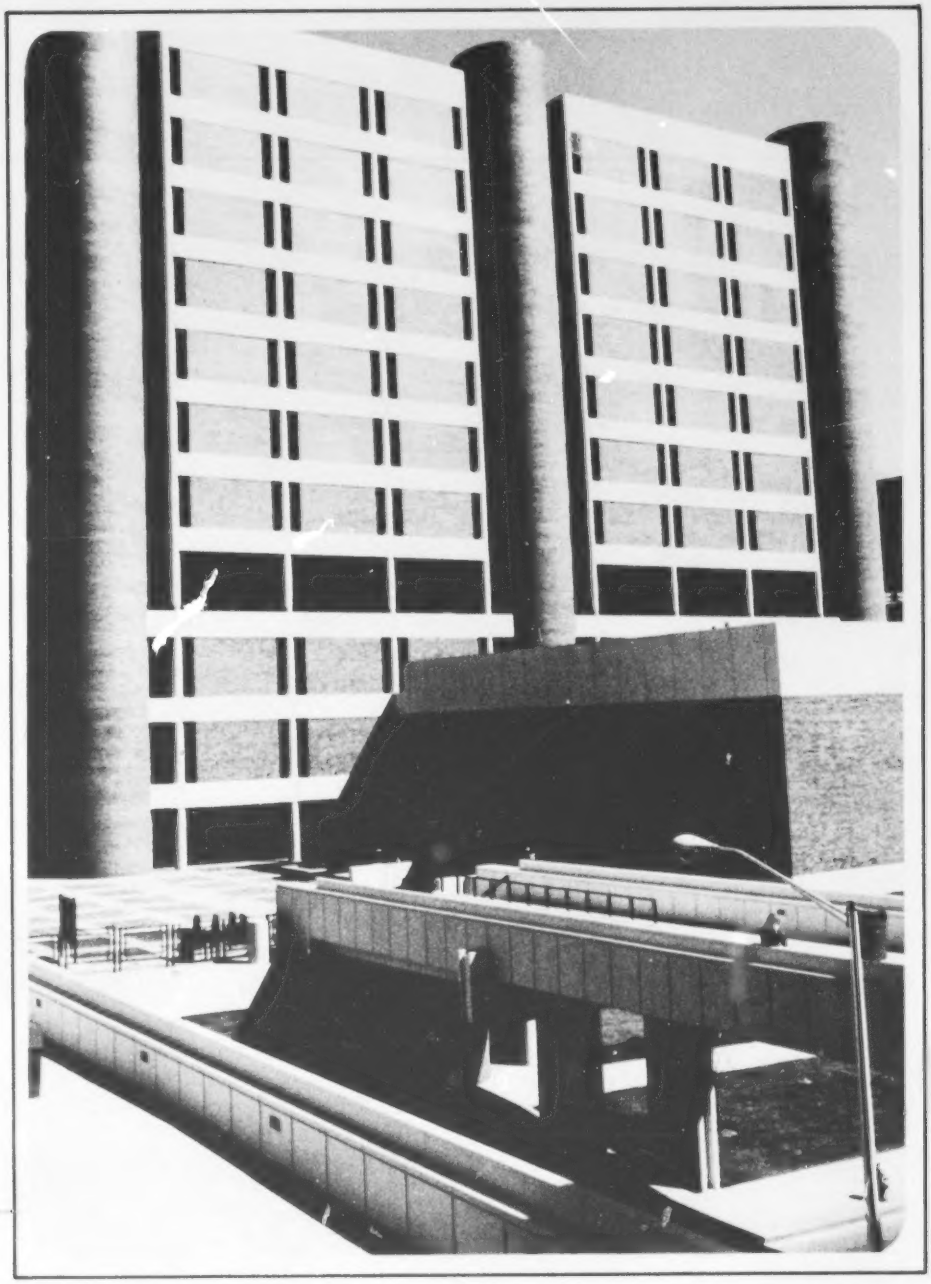
Urban Life Center Concept & Public Service



GEORGIA STATE UNIVERSITY

THE URBAN LIFE CENTER

The Urban Life Center was established in 1968 as an essential element in the urban university concept fostered at Georgia State University. The overall purpose of the Center is to marshall academic, governmental, professional, and public resources, bringing them to bear on the problems of our urban society. Drawing upon these resources, the Center creates and conducts courses of instruction, action-oriented research, and public service programs coping with specific urban problems and contributing to the betterment of the urban environment. Vital contributions to Urban Life Center programs are made by faculty members of all the schools composing Georgia State University: Allied Health Sciences, Arts and Sciences, Business Administration, Education, General Studies, and the degree/credit arm of the Center, the School of Urban Life.

Service components of the Center include the following:

The Inter-University Urban Cooperative is responsible for communication and coordination between the Urban Life Center and Georgia's many colleges and universities, public and private, concerning joint projects in urban studies, urban research, and community service.

The Business Information Center is a University System of Georgia service function headquartered at the Urban Life Center. Its purpose is to provide a means by which all business and industrial firms in Georgia can obtain assistance from the various technical and management resources spread throughout the University System.

The Atlanta Urban Corps develops and administers an internship program that provides service-learning experiences for college students. In this program, young men and women from colleges across the nation participate directly in the day-by-day operation of public agencies in the Atlanta area. While doing work useful to the administrative and service agencies--and getting paid for this work--the students acquire firsthand knowledge of how these agencies actually function. This Urban Corps is the second largest in the nation, providing internships for 630 students from 80 colleges.

The Urban Life Associates is the citizens' advisory board to the Urban Life Center. It serves as a direct channel for community input into the programs and policies of the Center. A diverse group of more than 200 citizens from neighborhoods throughout metropolitan Atlanta, the Associates initiate, participate in, coordinate, and make recommendations concerning all activities of the Urban Life Center.

The Division of Public Service develops, coordinates, and conducts noncredit information and training seminars, workshops, conferences, and short courses designed to assist governmental-administrative-service agencies and community groups in dealing with urban problems and to aid them in planning. These public service programs have the underlying objective of bringing the public, the government, and the academic community together in a spirit of cooperation and open communication.

An Urban Life Center Budget, a special allocation of funds by the Board of Regents, is administered and managed as part of the University's Urban Life Center concept. These funds are used to support faculty research into the myriad problems bearing on the urban environment, and they are also used to finance the continuing education conferences and seminars which attack them. Last year 46 such projects were financed from this budget.

COMPUTER CENTER

The Georgia State University Computer Center, which is under the administration of the Vice President for Research and Academic Services, was founded in 1959 and today occupies the ground floor of the Business Administration Building. Two UNIVAC Series 70/7's and an IBM 1800 are available to users in the University community--faculty, staff, and students. The IBM 1800, housed in Kell Hall, is used to monitor and control experiments in psychological research.

The computers in the Center are used for much of the administrative work of the University, for faculty and student research, and extensively for instructional purposes. Users are able to access the remote computing facilities of the two UNIVAC 7's through 124 telephone lines. There are 26 terminals in Room 107 Business Administration Building and 11 in Room 229 General Classroom Building which are primarily, but not exclusively, for students. Terminals are also located in various administrative and faculty offices on campus. During a typical quarter, over 2200 students make use of the computer in their classwork, developing their problem-solving skills either by writing their own programs or by making use of the large library of programs available on the Systems.

The Computer Center also has a communications link to the IBM 360/65 at the University of Georgia and is a contributing node in the University System of Georgia Computer Network. A CALCOMP plotter and a Tektronix terminal, which produces on-line graphic display of data, add yet another dimension to the Center's data processing capabilities.

Computer Center personnel present instructional workshops in the classroom, and consultants are available to assist users on an individual basis. Short courses on computer-oriented topics are offered through the Division of Public Service in an effort to maximize use of our facilities. Communication with the user is further implemented through a bi-monthly newsletter and through documentation in a six-section User's Guide.

GEORGIA STATE UNIVERSITY

COUNSELING CENTER

The services of the Counseling Center reflect the concern of the University for intellectual, personal, and social needs for all students. Beyond providing remedial services for students in crisis, the program is regularly involved in preventive and developmental outreach services. These services are planned either to prepare students so they can more effectively use the University environment or to assist the University community to change so that the developmental experiences that a student needs are more readily available.

The Counseling Center was evaluated by representatives of the International Association of Counseling Centers and received full professional accreditation on November 1, 1974. A research monograph has been published to report studies concerned with effectiveness.

The functions of the Counseling Center are divided into five operational areas:

Counseling. A representative cross-section of the student body seeks individual counseling for vocational, educational, and emotional problems. Personal growth, anxiety reduction, communication skills, vocational development, grade-watching, marriage and family are titles descriptive of ongoing counseling services.

Outreach. Workshops for faculty and staff are designed to help them in their work with students. Skill training groups are offered to both students at the University and to the Atlanta community at large. Workshops such as couples communication programs, "Assertive Training," "Your Next Step," and "Study Skills Circus" have become a continuing effort.

Testing and Research. During 1975-76, 37,460 tests were administered to 21,834 individuals encompassing the Institutional Testing Program for admission, placement, and evaluation; individual counseling; and national testing activities for the Psychological Corporation and Educational Testing Service is also provided, and over 150,000 tests were scored this past year.

Learning Resources Laboratory. Programs meet needs of students who have deficiencies in fundamental learning skills and help advanced students become more effective in their study technique. Faculty consultations assist in identifying and alleviating students' learning difficulties.

Internship and Practicum. Doctoral students in psychology and counseling fulfill their clinical internship requirements under licensed supervision. Advanced Doctoral practicum experiences are offered to selected Georgia State University students. Para-professionals from the Department of Mental Health are given supervised experience in the Center.

GEORGIA STATE UNIVERSITY

CENTERS, CHAIRS AND INSTITUTES

CENTERS

Bureau of Business and Economic Research (School of Business Administration)

Designed to increase both basic and applied knowledge in the area of general economics, business operations, and regional development, 1950.

Center for Business and Economic Education (School of Business Administration)

Designed to expand and improve the teaching and learning of economics at all levels from kindergarten through graduate school and beyond, 1963.

Center for Insurance Research (School of Business Administration)

An organizational entity under the aegis of Educational Foundations, Inc., for the planning, development and execution of the research function for the insurance program at Georgia State University, 1958.

Center for Professional Management Education (School of Business Administration)

Designed to provide an array of management development programs, conferences, and seminars covering topics of current interest and relevance to business, government, and other organizations, 1970.

Continuing Education Center (School of Education)

(1) Prepares new proposals and ideas, (2) coordinates and monitors existing research, development, dissemination, and service projects, (3) evaluates incoming requests for assistance from the School of Education by school systems, the State Department of Education, other colleges and universities, private agencies, and governmental agencies, and (4) provides internships or field experiences for graduate students, 1970.

CHAIRS

Chair of Private Enterprise (School of Business Administration)

Designed to provide teachers and students with a better understanding of, and more complete appreciation for our system of private enterprise, 1963.

Fuller E. Callaway Chair in Quantitative Methods (School of Business Administration)

A chair awarded to the School of Business Administration for a distinguished professor, 1973.

Fuller E. Callaway Chair in Education (School of Education)

A chair awarded to the School of Education for a distinguished professor, 1968.

Fuller E. Callaway Chair in English, Language and Literature (School of Arts and Sciences)

A chair awarded to the School of Arts and Sciences for a distinguished professor, 1969.

Mills B. Lane Chair of Banking and Finance (School of Business Administration)

Established to insure a high quality financial education program at Georgia State University, 1968.

INSTITUTES

Institute of Governmental Administration

Established to facilitate the University's response to the growing needs and problems of the public sector. The Master of Governmental Administration degree is offered. The Institute also develops and coordinates a variety of public service activities designed to serve administrators in public agencies, 1972.

Institute of Health Administration (School of Business Administration)

Formed in recognition of the increasing importance of the administration of health care facilities and agencies in modern society and the increasing importance of higher education for professionals and practitioners in the field, 1952.

Institute of International Business (School of Business Administration)

To prepare graduate students for careers dealing with the corporate phases and teaching of International Business, 1964.

National Special Media Institutes (NSMI) (School of Education)

These institutes teach educational administrators, specialists, and classroom teachers to apply a systematic instructional developmental model in solving instructional problems, 1971.

The Career Opportunities Program (COP) (School of Education)

Developed through HEW (1) to provide teachers who can better relate to inner-city children and their particular learning problems; and (2) to up-grade the economic and educational levels of practicing teacher-aides and teacher assistants in inner-city schools, 1970.

The Georgia State University Follow Through Program (School of Education)

A diagnostic program which focuses on the interactions of parent with child and teacher with child. The program is a cooperative process between the University and each local school district, 1971.

The Teacher Corps Program (School of Education)

A consortium of eight Atlanta area higher education institutions developing a program which is characterized by modular instruction to create more competent teachers. The program brings beginning juniors in Early Childhood and Elementary concentrations through the baccalaureate degree and into graduate level work, 1971.
